Flag: Follow up

Maryam,

I'm running to a meeting until around 12:30... Can you please either attach the AB 389 Response Plan, or send a screen shot of it highlighted on Envirostor so I can be sure to find the right document?

I've CC'd Kathy Baylor and Patrick Wilson, who will be on our call today. Please CC them about the response plan too...

Thanks,
Sara

Subject: Today's Call Re Riv Ag Park

Sara:

For today's call, I wanted to make sure that you had access to the AB 389 Response Plan via EnviroStor. We will be looking at the text, tables and figures. Here are the pertinent sections:

1. Section 3.6 summarizes the numbers of samples analyzed for constituents other than PCBs. We can use that as a start point, and then jump back to sections 3.1 through 3.5;
2. The Figures are D sized on our end, but we should be able to zoom in on one of the plots to discuss sampling locations
3. The Tables have the results from both PCB and other analytes, for both soil and groundwater assessments.

We will also be walking through the Phase 2 implementation plan, which describes the iterative hot-spot removal and soil confirmation sampling process:

1. We will focus on Section 4, the summary of excavation activities and walk the removal and confirmation sampling process

2. I can't find the Phase 2 Imp Rpt on EStor, it seems that it may have been bumped when we began loading all the manifests. I have attached it for your convenience.
